

Barcelona Institute of
Science and Technology

Ready for a taste of world-class research over the summer?

Internships for undergraduate students are now available at the research institutes that form the Barcelona Institute of Science and Technology. Apply now to spend 1-3 months between June and October 2016 doing research at one of the BIST centres. Open to national and/or international university students currently working toward their undergraduate degrees.

Topics covered include:

**Biomedicine – Chemistry
– Genomics – Informatics –
Mathematics – Nanotechnology
– Photonics – Physics –
Statistics – Structural Biology
and more...**
